SAVAN VAGHASIYA

Android Developer

+91-7990558210 ssvaghasiya061@gmail.com https://www.linkedin.com/in/savanvaghasiya/

PROFESSIONAL SUMMARY

Highly skilled Android Developer with 5+ years of experience delivering scalable, high-performance mobile apps.
Expert in Kotlin, Jetpack Compose, and Clean Architecture with strong command of MVVM.
Proven track record in real-time communication, offline-first systems, and enterprise-level integrations.
Focused on performance optimization, maintainability, and seamless cross-functional collaboration.

EDUCATION

GUJARAT TECHNOLOGICAL UNIVERSITY
B.E. in Computer Engineering
2016 - 2020

GS & HSEB
HSC
2014 - 2016

TECHNICAL SKILLS

- **Languages**: Kotlin, Java
- **UI Frameworks**: Android Jetpack Compose, Compose Multiplatform, React Native
- **Architecture**: MVVM, Clean Architecture, SOLID Principles, RxJava
- **Reactive/Concurrency**: Kotlin Flow, Coroutines, LiveData
- **Persistence**: RoomDB, DataStore, Firestore, Shared Preferences
- **Protocols**: WebSocket, Socket.IO, Okhttp
- **Communication**: Bluetooth, WiFi Direct, WiFi Hotspot (Ktor Server)
- **Libraries**: Ktor Client/Server, Retrofit, Ditto, Mockk(Unit test)
- **Cloud & Services**: Firebase (Auth, FCM), AWS S3 Bucket, Google Maps & Places API
- **DI/Testing**: Dagger Hilt, Koin, Appium (UI Testing), Unit Testing (Mockk)
- **Other**: Git, DSA, Azure, Scrum Skills, Postman, IntelliJ, VS code.

WORK EXPERIENCE

Carnival Corporation (SKO Systems) — SEP'24-PRESENT

Miami, USA(Remote)

mBark (Cruise Embarkation System)

- **Core Function**: Passenger onboarding, check-in, and manifest management.
- **Key Technical Contributions**:
  - Secure File Transfer: Engineered a robust **Bluetooth Low Energy** (BLE) protocol for secure, localized manifest synchronization and file transfer between devices.
  - Biometric Integration: Integrated **ML Kit** for hands-free auto face capture (biometrics) and high-speed barcode scanning for ticket processing.
  - High-Throughput Communication: Led the development of a **one-to-many file transfer** system utilizing a Ktor Server implementation over a dynamic WiFi Hotspot, alongside standard WiFi Direct for peer-to-peer needs.
  - Architecture: Implemented a robust **offline-first architecture** leveraging RoomDB and Kotlin Coroutines, guaranteeing data availability in low-connectivity environments.

EZmuster (Emergency Drill Management)

- **Core Function**: Real-time crew coordination and passenger drill management.
- **Key Technical Contributions**:
  - Real-Time Sync: Designed secure, resilient device-to-device communication protocols using **Ditto-based synchronization** for instantaneous data updates.
  - Data Persistence: Maintained data reliability and integrity during network partitioning via offline-first modules (**RoomDB**).
  - Testing: Validated business logic through rigorous unit testing on ViewModel and Repository layers.

CCL EZboard – Ship On/Off Passenger Movements

- **Core Function**: Handles passenger onboarding/offboarding operations.
- **Key Technical Contributions**:
  - Enhanced and maintained the internal Android app for smoother ship operations.
  - Implemented a secure one-to-many file transfer system for broadcasting files to multiple receivers.
  - Used Java, MVC, ViewBinding, and RoomDB to ensure a clean architecture and offline-ready data handling.

IXFI (Chaintech Network)
Ahmedabad, Gujarat

DEC'22-SEP'24

IXFI – Crypto Exchange App

- **Core Function**: Full-scale crypto trading, wallet, and market data application.
- **Key Technical Contributions**:
  - Modern UI: Built the entire application using 100% **Jetpack Compose** for a highly responsive and modern UI/UX.
  - Low Latency Data: Integrated **Ktor** WebSockets for continuous, real-time market data streaming and instantaneous order book updates, crucial for trading accuracy.
  - Financial Functionality: Developed core financial modules (Buy/Sell, Convert, Wallet) and managed complex state/transaction logic using MVVM and structured Coroutines.
  - Custom UI: Created custom, high-performance UI components and advanced financial charting visualizations directly using the Compose toolkit.

Hyperlink Infosystem
Ahmedabad, Gujarat

AUG'21-DEC'22

Swiss Watch Auction

- **Core Function**: Buyer and seller platforms for real-time watch auctions.
- **Key Technical Contributions**:
  - Real-Time Bidding: Implemented **Socket.IO** for highly responsive, low-latency bidding updates, supporting dynamic and competitive auctions.
  - Media Storage: Integrated **AWS S3** for scalable and secure storage of high-quality watch images.

Alyst (Social Media App)

- **Core Function**: Instagram-style social media platform with posting and chat.
- **Key Technical Contributions**:
  - Feature Parity: Built Instagram-style post/feed system functionality.
  - Real-Time Chat: Implemented real-time chat functionality using Socket.IO.
  - Location Services: Integrated **Google Maps** for location tagging features on posts.

Neebu (Trip Management App)

- **Core Function**: Trip scheduling, management, and travel tools.
- **Key Technical Contributions**:
  - APIs: Integrated **Google Places & Directions API** for routing and search features.
  - Notifications: Implemented push notifications using **Firebase Cloud Messaging (FCM)**.
  - Modules: Developed robust trip scheduling and management modules.

Voicem (Voice Recorder App)

- **Core Function**: Audio recording, playback, and cloud backup.
- **Key Technical Contributions**:
  - System Development: Developed and optimized the core audio recording and playback systems.
  - Functionality: Implemented features like scheduled recording reminders.
  - Cloud Storage: Integrated AWS S3 for secure cloud media storage and retrieval.

Ealiox (Crypto eCommerce)

- **Core Function**: Online retail platform integrated with cryptocurrency payments.
- **Key Technical Contributions**:
  - Crypto Payments: Integrated the **Magic SDK** for seamless, passwordless user authentication and crypto payment processing at checkout.
  - ECommerce System: Developed the complete order, inventory, and cart system.
  - Real-Time Features: Used Socket.IO for real-time chat functionality within the app.

React Native Projects (Cross-Platform)

- **Invoice Assist**: Developed for invoice management.
- **FlexiHeart**: Developed for hospital user and patient management.

Kartum Infotech
Surat, Gujarat

OCT'20-JUL'21

Amazing Star (Apartment Maintenance App)

- **Core Function**: Maintenance booking and event tracking for residential complexes.
- **Key Technical Contributions**:
  - Real-Time Database: Utilized **Firestore** for real-time data updates across maintenance booking and event tracking modules.

Stadbeat (Football Field Booking App)

- **Core Function**: Player and field management with real-time communication.
- **Key Technical Contributions**:
  - Messaging: Integrated **Firebase Chat** for real-time user-to-user messaging.
  - Modules: Developed core modules for player and field management.

CRM System

- **Core Function**: Enterprise application for employee tracking and task management.
- **Key Technical Contributions**:
  - Modules: Built dedicated modules for employee activity tracking and scalable task management.
